

# Havahart® Battery-powered Electric Pet Fencing System SS-2KX

## Havahart Pet & Garden Protection Electric Fence Kit

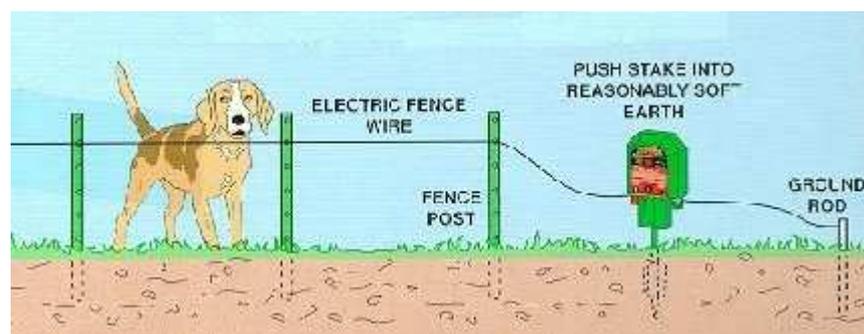

The **Havahart® Battery Powered Pet & Garden Protection Kit** trains pets and/ or unwanted animals to stay away. The electric pet fence can be used to break your pet's bad habits and keep them fenced in - it delivers a mild shock, deterring animals from the area.

The electric pet fence conditions your pet or dog to avoid the area. The SS-2D electric fence energizer emits an intermittent output pulse which is mild yet unpleasant. A pet that has experienced the mild shock from the SS-2D several times may eventually avoid the electric fence altogether. The electric fence system is also used to deter pests (e.g. rabbits, possums etc.) from entering your yard or garden.

## How it Works

The **Havahart®** electric pet fence not only keeps your pet, cat and dog in, it also keeps out unwanted animal intruders out of your garden and yard!

The electric fence system is made up of several key components: the electric fence energizer, the transmission lines (fence wire), fence posts with insulators, and the grounding path (earth). The animal provides the final link to complete the electrical path.

An electric fencing system presents a mental barrier to an animal rather than a physical barrier. Once an animal is shocked, it will respect the fence out of fear of being shocked again, even though it has not been harmed. The electric fence energizer produces an electrical pulse that travels through the lead-out wire into the wire(s). The electricity then flows through the animal's body into the soil and back to the ground rod which is connected to the energizer's ground terminal.

# Specifications

Havahart® is your ultimate source for above-ground electric fence kits. Havahart® electric fence kits provide economical, easy and effective solutions to keep pets and other small animals and predators out of landscape features, gardens and animal corrals.

The SS-2KX electric fence system is designed for quick and easy installation. It can be connected to the wires of an existing electric fence (only one energizer per system) or you can easily build a new fence using the SS-2KX electric fence kit. The kit contains everything you need to fence up to 100ft (35m): energizer, fence wire, fence poles, ground rod, clamps, tester etc. The SS-2D energizer is powered by two standard D-cell batteries that can be bought in any supermarket. The batteries last approximately two months. Accessories such as additional fence wire, extra poles and a solar energizer can be purchased separately.

## Package includes

- SS-2D energizer (powered by two D-Cell batteries – not included)
- 100 ft. (30m) fence wire, maximum length: 1 mile
- 10x 30 inch (76cm) PVC fence poles
- Ground stake
- 30 cotter pins
- Ground rod with clamp
- Electric fence warning sign
- Fence Tester
- Manual

## Accessories (not included)

- Pack of 10x 30 inch (76cm) PVC fence poles
- 250 ft. (85m) fence wire
- Solar Energizer SS-440
