

WaterDog® automatic outdoor pet drinking fountain

Ensure your dog always has access to fresh, clean water.

The WaterDog® automatic outdoor pet drinking fountain lets your dog help itself to fresh water, so you don't have to worry about stagnant or empty water bowls. WaterDog senses your dog's approach, and automatically dispenses a cool, clean stream of fresh drinking water. Smart sonar sensing technology triggers the WaterDog to turn the water on when your pet comes within three feet (one meter), and turns it off when your pet leaves. You will never have to worry about what your dog's been drinking again!

WaterDog

- operates automatically, providing fresh water when your pet approaches
- accommodates your dog day and night for up to one year on just four C-cell batteries
- connects quickly and easily to any outdoor faucet
- includes a flow-through connector to accommodate your garden hose as well

How & Why it Works

The WaterDog is an automatic drinking fountain that is designed to give your pet direct access to fresh clean water, at any time. A sonar-based proximity sensor triggers the WaterDog to turn the water on when your pet comes within three feet (one meter), and turns it off when your pet leaves.

Dogs quickly learn that they can always get a drink from the WaterDog. This greatly reduces the risk of your dog becoming dehydrated on a hot day, or developing disease from a contaminated water bowl.

The Waterdog attaches easily, without tools, to any outdoor faucet, and the height is fully adjustable to suit any sized dog. With the "Y" connector (included), you can connect a garden hose alongside the WaterDog, so you never need to remove the device to water your garden.

Specifications

The WaterDog automatic outdoor pet drinking fountain is constructed of durable, high-quality UV resistant materials, and has been designed to provide many years of reliable service. White-colored components keep the WaterDog cool, even on bright, sunny days.

- Sonar proximity sensor automatically turns the water on when your dog is near, and turns it off again when it leaves.
- The WaterDog senses your dog's presence within a 40-degree angle in front of the unit, and up to three feet (one meter).
- The height of the unit is fully adjustable.
- Operates for up to one year on a single set of batteries.

Frequently Asked Questions

Can any size dog use the WaterDog?

The WaterDogs height is adjustable, making it suitable for dogs of almost any size.

I want to be able to use other hoses on the same tap that I have the WaterDog installed on, can this be done?

The WaterDog comes with a 'Y' connector – this lets your tap remain free to attach other hoses.
