

# Bed Bug ALERT

**Check for bedbugs  
BEFORE they strike!**

Bedbugs hide away in cracks and crevices, making them hard to detect. Clear, safe, rigid plastic monitoring device slips between mattress and frame. The special gel attracts and traps bedbugs if they are present - alerting you to their presence before it's too late!

- **Take control**
- **Restore peace-of-mind**
- **YOU monitor and check**
- **Bed Bug Alert lets you know when to take action!**

**Use anywhere -**

**Hotels, nursing homes, dorms, at home -**

**and sleep tight!**

# Bed Bug ALERT

## Check for bedbugs BEFORE they strike!

Lures and captures adult bedbugs and immature instar nymphs - shown magnified below:

### YOU CONTROL BED BUG MONITORING DAILY:

**Step 1** - Simply insert the business card size Bed Bug Alert between the mattress and box spring in the corners at the head of the bed.

**Step 2** - Check the Bed Bug Alert daily and discard immediately should it contain a bed bug.

**Step 3** - Notify a pest control company for treatment.

### BENEFITS OF *Bed Bug ALERT* MONITOR:

**Peace of mind** - Hotels, motels, hospitals, long term care facilities, theatres, retail outlets, schools, gyms, restaurants to monitor the environment.

**Discreet** - While the Bed Bug Alert is transparent for inspection, it is also invisible for those who don't know it's between the mattress and box spring

**Immediate call to action** - No need to wait to be bitten - bed bugs are drawn into the Bed Bug Alert by environmentally sound bed bug lure; as soon as a bed bug shows up, call your local pest control company.

**Effective** - You or your staff inspect the Bed Bug Alert daily.

**Easy Removal** - Replace as required, creating a long term, low cost monitoring program.
